The damage may have not been intentional. *Answer "It may be difficult to obtain a trail of evidence of activities performed on the computer" describes the situation of trying to track activities on a computer where the information is volatile and may have been destroyed. * In answer "It may be difficult to show causation", common law refers to causation of the criminal act. Causation is particularly difficult to show in instances where a virus or other malicious code erases itself after causing damage to vital information.
