NEW QUESTION: 1Which of the following is not a valid Terraform string function?**A.** join**B.** toString**C.** replace**D.** format**Answer: B****Explanation:**Explanation
<https://www.terraform.io/docs/configuration/functions/tostring.html>

NEW QUESTION: 2The client's lab culture report is negative for a suspected infection. A test that can correctly identify those who do not have a given disease is:**A.** sensitive.**B.** marginal finding.**C.** specific.**D.** negative culture.**Answer: C****Explanation:**Explanation/Reference:
Explanation:Testing that identifies clients without a disease is said to be specific, while testing that identifies clients with a disease is said to be sensitive. Safety and Infection Control

NEW QUESTION: 3You are designing a SQL Server Integration Services (SSIS) package that uses the Fuzzy Lookup transformation.The reference data to be used in the transformation does not change.You need to reuse the Fuzzy Lookup match index to increase performance and reduce maintenance.What should you do?**A.** Execute the sp_FuzzyLookupTableMaintenanceUninstall stored procedure.**B.** Execute the sp_FuzzyLookupTableMaintenanceInvoke stored procedure.**C.** Select the GenerateAndPersistNewIndex option in the Fuzzy Lookup Transformation Editor.**D.** Select the GenerateNewIndex option in the Fuzzy Lookup Transformation Editor.**E.** Select the DropExistingMatchIndex option in the Fuzzy Lookup Transformation Editor.**Answer: C****Explanation:**ExplanationReferences:<http://msdn.microsoft.com/en-us/library/ms137786.aspx>

NEW QUESTION: 4You create a Power Apps app that integrates with Dynamics 365 Customer Service.You update the app and run solution checker on the original solution. You receive an error stating solution checker cannot export the solution.You need to determine the primary cause for the issue.What is the primary cause?**A.** The environment is an Administrator mode.**B.** The original solution is locked because there is a dependent patch.**C.** The solution was not exported before running solution checker.**D.** Solution checker cannot check default solutions.**Answer: B****Explanation:**ExplanationSolution checker fails to export patched solutions.If a solution has had a patch applied, Solution Checker will fail to export the solution for analysis. When a solution has had a patch applied, the original solution becomes locked and it can't be changed or exported as long as there are dependent patches that exist in the organization that identify the solution as the parent solution.To resolve this issue, clone the solution so that all patches related to the solution are rolled into the newly created solution. This unlocks the solution and allows the solution to be exported from the system.Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/common-issues-r>
