Their preparations are blind, And the reason why they are so well received is that the questions of 2V0-11.24 exam VCE they designed for the examinees have a high hit ratio.

Comparing to PDF version which may be printed out and used on paper, these two versions of 2V0-11.24 Test Simulates should be used on electronic device.

NEW QUESTION: 1 Which of the following is a management role, versus a technical role, as it pertains to data management and oversight?
A. Database administrator
B. Data processor
C. Data owner
D. Data custodian
Answer: C
Explanation: Explanation/Reference: Explanation: Data owner is a management role that's responsible for all aspects of how data is used and protected. The database administrator, data custodian, and data processor are all technical roles that involve the actual use and consumption of data, or the implementation of security controls and policies with the data.

NEW QUESTION: 2 A company runs large computing jobs only during the overnight hours. To minimize the amount of capital investment in equipment, the company relies on the elastic computing services of a major cloud computing vendor. Because the virtual resources are created and destroyed on the fly across a large pool of shared resources, the company never knows which specific hardware platforms will be used from night to night. Which of the following presents the MOST risk to confidentiality in this scenario?
A. Distribution of the job to multiple data centers
B. Data scraped from the hardware platforms
C. Network transmission of cryptographic keys
D. Loss of physical control of the servers
Answer: B

NEW QUESTION: 3 Which two statements are true for NFS v4.1 firewall behavior? (Choose two.)
A. It opens port 2049.
B. It sets allowed. All flag to TRUE.
C. It sets allowed. All flag to FALSE.
D. It closes port 2049.
Answer: A, B
Explanation: Explanation/Reference: Explanation: NFS v4.1 Firewall Behavior When you mount the first NFS v4.1 datastore, ESXi enables the nfs41client rule set and sets its allowedAll flag to TRUE. This action opens port 2049 for all IP address. Unmounting an NFS v4.1 datastore does not affect the firewall state. That is, the first NFS v4.1 mount opens port 2049 and that port remains enabled unless you close it explicitly.
