Your life will totally have a great change.

NEW QUESTION: 1**HOTSPOT****Answer:** Explanation:Explanation:The Get-MsolUser cmdlet gets an individual user or list of users from Azure Active Directory.The -UnlicensedUsersOnly parameter indicates that only users who are not assigned a license are returned.The Set-MsolUser cmdlet modifies a user object in Azure Active Directory.References:
<https://docs.microsoft.com/en-us/powershell/module/msonline/get-msoluser?view=azureadps-1.0>
<https://docs.microsoft.com/en-us/powershell/module/msonline/set-msoluser?view=azureadps-1.0>**Topic 3, Contoso, Ltd (Case Study A)Background**Contoso, Ltd. is a global manufacturing company with headquarters in Dallas. All sales users are located at the headquarters. Currently all Contoso, Ltd. users use the following on-premises services:* Microsoft Exchange Server 2016* Microsoft Skype for Business Server 2015* Active Directory Domain Services (AD DS) domain for contoso.comMany temporary workers are hired and terminated on a regular basis at the Dallas location, Contoso, Ltd. purchases two other manufacturing companies, Fabrikam, Inc. and ADatum Corporation. Fabrikam, Inc. is based in London. Fabrikam, Inc. has an on-premises third- party email system that uses @fabrikam.com for all email addresses. Fabrikam, Inc. does not have an Active Directory domain.ADatum Corporation is based in Paris. The company is in the process of migrating users to Exchange Online. They plan to migrate users to Microsoft OneDrive for Business for file storage and sharing. All ADatum Corporation account identities will be cloud based.You deploy Microsoft Office 2016 client apps to all corporate devices.In preparation for the deployment of Office 365 services, you set up the latest version of Azure Active Directory (Azure AD) Connect for the contoso.com domain. The application runs on Server1.contoso.com and uses a Microsoft SQL Server database instance that runs on Server2.contoso.com. The sync schedule is configured to synchronize every two hours.You purchase the following four servers for future needs: Server3, Server4, Server5, and Server6. All new servers for the contoso.com domain must run Windows Server 2012 R2.**Business Requirements**Contoso, Ltd. users must be able to store and share personal documents that are accessible from any web browser or mobile device. Fabrikam, Inc. users must be able to send individual instant messages as well as use group chat workspaces. Office 365New services should be implemented in Office 365 when possible. There is also a strong push to move existing services to Office 365, but there is currently no money in the budget for data migration. The least expensive Office 365 plan must be used whenever possible.**Password policies**You must implement the following password policies for ADatum Corporation users.**Contoso Sync**You receive reports that new users are not granted access to Office 365 resources fast enough. You must ensure that new accounts are provisioned as quickly as possible.You observe that the accounts for many temporary workers have not been deprovisioned correctly. You need to ensure terminated users have their access and accounts removed.You must ensure that up to 1,000 accounts can be deleted correctly during each Azure AD Connect sync cycle. You must ensure that deletions of over 1,000 accounts at a time cannot occur.**Single Sign-On**Contoso.com users need to start using sign-on (SSO) for Office 365 resources so they can authenticate against the on-premises Active Directory. Any solution needs to be redundant.Any Internet-facing servers need to reside in the perimeter network.**Problem Statements****Authentication Fallback**Sales users report that they were not able to

access any Office 365 resources. Contoso.com users must be able to access Office 365 resources if the on-premises authentication resources are down or unavailable. You also need to quickly resume SSO authentication when on-premises servers are available again. ADatum Corporation users report issues sending and receiving emails. Some business partners report that emails from ADatum Corporation are rejected because the receiving server cannot validate that emails come from an authorized messaging server.

NEW QUESTION: 2 When a student in a lab is kept from participating due to a technical problem the instructor should FIRST: **A.** Ignore the problem and work with the student during a break so the class is not disturbed. **B.** Concentrate on getting the student's technical problem solved so they can learn with the rest of the class. **C.** Try to quickly analyze the problem to resolve the issue. **D.** Have another learner help the student while the instructor continues teaching. **Answer: C** Explanation: Explanation/Reference: Explanation:

NEW QUESTION: 3 Which would be the BEST recommendation to protect against phishing attacks? **A.** Provide security awareness to the organization's staff **B.** Install an antispam system **C.** Publish security guidance for customers **D.** Install an application-level firewall **Answer: C** Explanation: Explanation/Reference: Explanation: Customers of the organization are the target of phishing attacks. Installing security software or training the organization's staff will be useless. The effort should be put on the customer side.

NEW QUESTION: 4 Which TCP ports are used internally within the Expressway-E and Expressway-C? **A.** 0 **B.** 1 **C.** 2 **D.** 3 **Answer: C**
