We guarantee that your money is safe, **Valid Test User-Experience-Designer Tutorial** Our company has the highly authoritative and experienced team.

NEW QUESTION: 1You are Cisco Channel Partner Account Manager. You are planning to conduct a project kick-off in the plan phase, which of the following benefits customer can get?
A. customer can get end-user support immediately after the launch of a new system
B. customer can confirm project roles and responsibilities, as well as milestone dates
C. customer can reduce the risk of downtime
D. customers can receive detailed network diagrams
Answer: B
Explanation:Explanation/Reference:Explanation:

NEW QUESTION: 2Which two measures are most effective in protecting websites from cross site scripting (XSS) attacks?
A. Ensure that the session cookie is sent only on UTTPS connections.
B. URL-encode "<" and ">" parameters so they will never be evaluated by the

JavaScript Interpreter.**C.** Execute all user-supplied scripts in a server-side sandbox.**D.** Escape "<" and ">" parameters that displayed or evaluated by the JavaScript interpreter.**E.** Treat all user-supplied input as unsafe, and white list known good characters**Answer: A,C**

NEW QUESTION: 3A _____ eliminates the need to remove or install materials.**A.** Factory fabricated sleeve system**B.** Cable transit system**C.** Fire-rated pathway device**D.** Cast-in-place device**Answer: C**

NEW QUESTION: 4 Amazon Elastic MapReduce (Amazon EMR) を使用すると、膨大な量のデータを分析および処理できます。クラスターは、Hadoopと呼ばれるオープンソースフレームワークを使用して管理されます。You have set up an application to run Hadoop jobs. The application reads data from DynamoDB and generates a temporary file of 100 TBs. The whole process runs for 30 minutes and the output of the job is stored to S3. Which of the below mentioned options is the most cost effective solution in this case?**A.** Use an on demand instance to run Hadoop jobs and configure them with ephemeral storage for output file storage.**B.** Use an on demand instance to run Hadoop jobs and configure them with EBS volumes for persistent storage.**C.** Use Spot Instances to run Hadoop jobs and configure them with EBS volumes for persistent data storage.**D.** Use Spot Instances to run Hadoop jobs and configure them with ephemeral storage for output file storage.**Answer: D****Explanation:**Explanation AWS EC2 Spot Instances allow the user to quote his own price for the EC2 computing capacity. The user can simply bid on the spare Amazon EC2 instances and run them whenever his bid exceeds the current Spot Price. The Spot Instance pricing model complements the On-Demand and Reserved Instance pricing models, providing potentially the most cost-effective option for obtaining compute capacity, depending on the application. The only challenge with a Spot Instance is data persistence as the instance can be terminated whenever the spot price exceeds the bid price. In the current scenario a Hadoop job is a temporary job and does not run for a longer period. It fetches data from a persistent DynamoDB. Thus, even if the instance gets terminated there will be no data loss and the job can be re-run. As the output files are large temporary files, it will be useful to store data on ephemeral storage for cost savings.
