If you have more strength, you will get more opportunities.

**NEW QUESTION: 1A. Option CB. Option DC. Option BD. Option AAnswer: D**

**NEW QUESTION: 2**Your database has the SRV1 service configured for an application that runs on middle-tier application server. The application has multiple modules. You enable tracing at the service level by executing the following command:SQL > exec DBMS\_MONITOR.SERV\_MOD\_ACT\_TRACE\_ENABLE ('SRV1');The possible outcome and actions to aggregate the trace files are as follows:1. The command fails because a module name is not

specified.2. A trace file is created for each session that is running the SRV1 service.3. An aggregated trace file is created for all the sessions that are running the SRV1 service.4. The trace files may be aggregated by using the trcess utility.5. The trace files be aggregated by using the tkprof utility. Identify the correct outcome and the step to aggregate by using tkprof utility?  
**A. 2 and 4****B. 3 and 4****C. 3 and 5****D. 0****E. 2 and 5**  
**Answer: A**  
**Explanation:** Tracing information is present in multiple trace files and you must use the trcess tool to collect it into a single file.  
**Incorrect:** Not 1: Parameter service\_name Name of the service for which tracing is enabled.  
module\_name Name of the MODULE. An optional additional qualifier for the service.  
**Note:** \* The procedure enables a trace for a given combination of Service, MODULE and ACTION name. The specification is strictly hierarchical: Service Name or Service Name/MODULE, or Service Name, MODULE, and ACTION name must be specified. Omitting a qualifier behaves like a wild-card, so that not specifying an ACTION means all ACTIONS. Using the ALL\_ACTIONS constant achieves the same purpose.  
\* SERV\_MOD\_ACT\_TRACE\_ENABLE Procedure This procedure will enable SQL tracing for a given combination of Service Name, MODULE and ACTION globally unless an instance\_name is specified.  
\* DBMS\_MONITOR.SERV\_MOD\_ACT\_TRACE\_ENABLE(service\_name IN VARCHAR2,module\_name IN VARCHAR2 DEFAULT ANY\_MODULE,action\_name IN VARCHAR2 DEFAULT ANY\_ACTION,waits IN BOOLEAN DEFAULT TRUE,binds IN BOOLEAN DEFAULT FALSE,instance\_name IN VARCHAR2 DEFAULT NULL);

**NEW QUESTION: 3** An encrypted message is sent using PKI from Sara, a client, to a customer. Sara claims she never sent the message. Which of the following aspects of PKI BEST ensures the identity of the sender?  
**A. CRL****B. Trust models****C. Recovery agents****D. Non-repudiation**  
**Answer: D**  
**Explanation:** Section: Compliance and Operational Security  
**Explanation/Reference:** Explanation: Nonrepudiation prevents one party from denying actions they carried out. This means that the identity of the email sender will not be repudiated.
