To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation:ExplanationReferences: <https://docs.microsoft.com/en-us/azure/site-recovery/vmware-azure-tutorial>

NEW QUESTION: 4A recent audit uncovered a key finding regarding the use of a specific encryption standard in a web application that is used to communicate with business customers. Due to the technical limitations of its customers, the company is unable to upgrade the encryption standard. Which of the following types of controls should be used to reduce the risk created by this scenario?**A.** Preventive**B.** Detective**C.** Physical**D.** Compensating**Answer: D** Explanation:Preventative Preventative controls are designed to be implemented prior to a

threat event and reduce and/or avoid the likelihood and potential impact of a successful threat event. Examples of preventative controls include policies, standards, processes, procedures, encryption, firewalls, and physical barriers. Detective controls are designed to detect a threat event while it is occurring and provide assistance during investigations and audits after the event has occurred. Examples of detective controls include security event log monitoring, host and network intrusion detection of threat events, and antivirus identification of malicious code. Corrective controls are designed to mitigate or limit the potential impact of a threat event once it has occurred and recover to normal operations. Examples of corrective controls include automatic removal of malicious code by antivirus software, business continuity and recovery plans, and host and network intrusion prevention of threat events.
