**NEW QUESTION: 3**What are the differences between user-defined object functions and user-defined global functions? (Choose 3)**A.** Only object functions can throw exceptions**B.** User-defined global functions can be inherited**C.** The access level of a global function can be changed**D.** Only object functions can be overloaded and overridden**E.** User-defined global functions can be called from DataWindow expressions**Answer: C,D,E**

**NEW QUESTION: 4**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have a SharePoint Server farm and a SharePoint Online subscription. You plan to perform a bulk migration by using the SharePoint Migration Tool.You create the following CSV file. (Line numbers are included for reference only.)You need to modify the CSV file to ensure that the bulk migration will complete successfully. Solution: You change line 02 to use a UNC path instead of a local file path.Does this meet the goal?**A.** No**B.** Yes**Answer: A**Explanation:  
References:

<https://docs.microsoft.com/en-us/sharepointmigration/how-to-format-your-csv-file-for-data-content-migration>Topic 1, Litware inc OverviewExisting EnvironmentActive DirectoryThe network contains an Active Directory forest named litwareinc.com. The forest contains a single

domain. All domain controllers run Windows Server 2016.SharePoint Server Environment Litware has a SharePoint Server 2019 farm that contains the servers shown in the following table.Central Administration has a URL of http://spweb1.litwareinc.com.The HR department currently uses a SharePoint web application that uses only forms authentication.The sales department has a SharePoint site that is available anonymously to display product information.Line-of-Business ApplicationYou have a line-of-business application named LOBApp. LOBApp stores content in a SQL Server database named LOBAppDB.LOBApp has a service account named LobAppSA.Problem StatementsLitware identifies the following issues:\* None of the SharePoint sites use TLS.\* The Distributed Cache Problem service uses the farm account.\* When users perform searches from the SharePoint site of the HR department, they receive no results.\* You discover that the user names and passwords configured for managed services were transmitted on the network in plain text.RequirementsBusiness GoalsAll the components in the SharePoint Server farm must be highly available by using the least number of servers possible.Each document stored in the HR department site must have the following pieces of metadata: CONID, CONNO, CONDate, and CONApproved.SecurityThe farm uses the managed service accounts shown in the following table.Technical RequirementsLitware identifies the following technical requirements:\* LOBApp content must be visible in search results.\* The principle of least privilege must be used whenever possible.\* All SharePoint service applications must use the SpServices account.\* Information for each product must be displayed as a separate webpage for the sales department.\* Search crawling must start every 10 minutes, regardless of whether the prior session is complete.\* The Cloud Search Service Application must crawl on-premises content in a cloud hybrid search solution.\* The Secure Store Service application must use LitwareAppID as the target application to access LOBAppDB.
