NEW QUESTION: 1A. Option B. Option C. Option D. Option Answer: B

NEW QUESTION: 2 Which of the following is not a benefit associated with silo-based application design? Select the correct answer. **A.** The emphasis on fulfilling tactical (short-term) business requirements allows for a more predictable application delivery lifecycle. **B.** The analysis and design of applications are easier because strategic (long-term) business requirements don't usually need to be taken into account. **C.** The latest technology advancements can be leveraged by repeatedly building new applications from the ground up. **D.** Applications are always inherently built for repeated reuse across silos. **Answer: D**

NEW QUESTION: 3 You need to recommend a Client Access server design that meets the redundancy requirements of A, Datum. What should you include in the recommendation? **Case Study Title (Case Study): Datum Corporation Company Overview** A, Datum Corporation is a leading insurance company. **Physical Locations** A, Datum has a main office in Tokyo and a manufacturing plant in Bangkok. The offices connect to each other by using a heavily congested high-speed WAN link. Each office has a dedicated connection to the Internet. Research and development personnel are located in both the Tokyo office and the Bangkok office. **Existing Environment Active Directory Environment** A, Datum has an Active Directory forest that contains one domain named adatum.com. The Active Directory forest has the following configurations: -An Active Directory site exists for each office. -All domain controllers run Windows Server 2003 x86 Service Pack 2 (SP2). -The functional level of the forest and the domain is Windows Server 2003 interim. -All of the user accounts for the users in the Tokyo office are located in an organizational unit (OU) named UsersTokyo. -All of the user accounts for the users in the Bangkok office are located in an organizational unit (OU) named UsersBangkok. Each office has a human resources team. The human resources team in each office is responsible for managing all of the users in its respective office. **Messaging Environment** A, Datum has an Exchange Server 2003 Service Pack 2 (SP2) organization that has the following configurations: -A 375-MB mailbox quota for all users -An SMTP connector that has the following configurations: -Address space: *-Delivery: DNS-Local bridgehead: TOK-BE-1A, Datum has a partner company named Humongous Insurance. The A, Datum Exchange servers are configured as ETRN servers for humongousinsurance.com. The Exchange organization contains six servers. The servers are configured as shown in the following table. **Requirements Business Goals** A, Datum has the following business goals: Minimize hardware costs. Minimize administrative effort. Minimize WAN link utilization between the two offices. **Planned Changes** A, Datum plans to migrate to Exchange Server 2010 Service Pack 1 (SP1). Each office will contain Exchange servers.

You plan to deploy a Hub Transport server named TOK-HUB-1 in the Tokyo site. You plan to deploy a Hub Transport server named BAN-HUB-1 in the Bangkok site.

Archiving Requirements
Email messages that are older than 200 days must be moved automatically to a distinct mailbox database.

Security Requirements
A, Datum must meet the following security requirements:
-Anti-spam filtering must be performed on all email messages before the messages enter the network.
-The human resources teams must be allowed to modify only the user accounts of the users in their respective office.
-The number of permissions assigned to the members of a group named Exchange Secondary Support Staff must be minimized.

Redundancy Requirements
A, Datum must meet the following redundancy requirements:
-A copy of all the mailbox databases must exist in both sites.
-The impact on users must be minimized if a single server fails.
-Users must be able to send and receive email messages if a single server fails.
-All of the mailbox databases must be available if the WAN link fails between the offices.

Problem Statements
The WAN link between the Tokyo office and the Bangkok office is heavily congested. During normal business hours, the average round-trip time for packets to travel across the WAN link is 185 ms. The portable computer of the manager of the finance department recently experienced a hard disk failure. The hard disk failure resulted in the loss of more than three years of email.

A. One Client Access array
Two Client Access servers
One hardware load balancer
B. Four Client Access servers
One hardware load balancer
DNS round robin and subnet prioritization
C. Two Client Access arrays
Four Client Access servers
Two hardware load balancers
D. Two Client Access arrays
Four Client Access servers
DNS round robin and subnet prioritization
Answer: C
