A. Option DB. Option CC. Option BD. Option A

Answer: AExplanation:WS Identity and Access Management is a web service which allows organizations to manage users and user permissions for various AWS services. If the organization (AccountID 123412341234. wants some of their users to manage credentials (access keys,password, and sing in certificates. of all IAM users, they should set an applicable policy to that user or group of users. The below mentioned policy allows the IAM user to modify the credentials of all IAM user's using only CLI, SDK or APIs. The user cannot use the AWS console for this activity since he does not have list permission for the IAM users.
