NEW QUESTION: 1You have an Azure Active Directory (Azure AD) tenant named contoso.com that has a security group named Group1. Group1 is configured for assigned membership. Group1 has 50 members, including 20 guest users.You need to recommend a solution for evaluating the membership of Group1. The solution must meet the following requirements:* The evaluation must be repeated automatically every three months.* Every member must be able to report whether they need to be in Group1.* Users who report that they do not need to be in Group1 must be removed from Group1 automatically* Users who do not report whether they need to be in Group1 must be removed from Group1 automatically.What should you include in the recommendation?**A.** Change the Membership type of Group1 to Dynamic User.**B.** Create an access review.**C.** Implement Azure AD Privileged Identity Management.**D.** Implement Azure AD Identity Protection.**Answer: A****Explanation:**ExplanationIn Azure Active Directory (Azure AD), you can create complex attribute-based rules to enable dynamic memberships for groups. Dynamic group membership reduces the administrative overhead of adding and removing users.When any attributes of a user or device change, the system evaluates all dynamic group rules in a directory to see if the change would trigger any group adds or removes. If a user or device satisfies a rule on a group, they are added as a member of that group. If they no longer satisfy the rule, they are removed.References:
