NEW QUESTION: 1At work, you use a desktop computer that runs Windows 8 Pro. At home, you use a laptop that runs Windows 8. You use the same Microsoft account to log on to both computers. You want to use the same settings for both computers. You need to ensure that all computer settings, including stored passwords, are synced between the computers. What should you do?**A.** Add both computers to the same Active Directory domain.**B.** Designate both computers as trusted PCs.**C.** Use the same local accounts for both computers.**D.** Install SkyDrive for Windows on both computers.**Answer: B**

NEW QUESTION: 2Your team has a tomcat-based Java application you need to deploy into development, test and production environments. After some research, you opt to use Elastic Beanstalk due to its tight integration with your developer tools and RDS due to its ease of management. Your QA team lead points out that you need to roll a sanitized set of production data into your environment on a nightly basis. Similarly, other software teams in your org want access to that same restored data via their EC2 instances in your VPC .The optimal setup for persistence and security that meets the above requirements would be the following.**A.** Create your RDS instance separately and pass its DNS name to your's DB connection string as an environment variable Alter its security group to allow access to It from hosts In your application subnets.**B.** Create your RDS instance separately and pass its DNS name to your app's DB connection string as an environment variable. Create a security group for client machines and add it as a valid source for DB traffic to the security group of the RDS instance itself.**C.** Create your RDS instance as part of your Elastic Beanstalk definition and alter its security group to allow access to it from hosts in your application subnets.**D.** Create your RDS instance separately and add its IP address to your application's DB connection strings in your code Alter its security group to allow access to it from hosts within your VPC's IP address block.**Answer: C**

NEW QUESTION: 3HOTSPOT**Answer:** Explanation:
