We apply the international recognition **Latest 500-490 Test Notes** third party for the payment, and it will protect the interests of you.

NEW QUESTION: 1 Which of these possible problems does a nearly-full ProxySG disk indicate? (Select all that apply) **A.** One or more additional ProxySG appliances should be deployed in this network. **B.** Caching parameters are improperly set in the Management Console. **C.** None; this is a normal condition. **D.** This ProxySG should be upgraded to a more powerful model. **Answer: A,B**

NEW QUESTION: 2 Joe, the Chief Executive Officer (CEO), was an Information security professor and a Subject Matter Expert for over 20 years. He has designed a network defense method which he says is significantly better than prominent international standards. He has recommended that the company use his cryptographic method. Which of the following methodologies should be adopted? **A.** The company should use the method recommended by other respected information security organizations. **B.** The company should use the CEO's encryption scheme. **C.** The company should develop an in-house solution and keep the algorithm a secret. **D.** The company should use a mixture of both systems to meet minimum standards. **Answer: A**
Explanation: In this question, we have one person's opinion about the best way to secure the network. His method may be more secure than other systems. However, for consensus of opinion, it is better to use the method recommended by other respected information security organizations. If the CEO's methods were the best methods, it is likely that the other respected information security organizations would have thought about them and would be using them. In other words, the methods recommended by other respected information security organizations are probably the best methods. Furthermore, if the company's systems need to communicate with external systems, the systems will need to use a 'standard' method otherwise the external system may not be able to decipher the communications from the company's systems.

NEW QUESTION: 3 LUNスナップショットコピー操作についての説明 **A.**

親はスナップショットコピーにすることができます。アタッチまたはデタッチされたスナップショットをコピーすることができます。 **B.**

親はスナップショットコピーになることができます。デタッチされたスナップショットのみを親からの独立した保存ポリシーとしてコピーできます。 **C.**

親をスナップショットコピーにすることはできません。アタッチまたはデタッチされたスナップショットをコピーすることができます。親のスナップショット保存ポリシーに従います。 **D.**

親をスナップショットコピーにすることはできません。切り離されたスナップショットのみを親からの独立した保存ポリシーとしてコピーできます。 **Answer: B**
Explanation: Explanation Note: You can create copies of LUNs by cloning LUNs from the Snapshot copies in a volume. These FlexClone LUNs are readable and writable copies of the LUNs as the LUN existed when the Snapshot copy was created. Before you can clone a LUN, you must create a Snapshot copy (the backing Snapshot copy) of the LUN you want to clone. References:
