NEW QUESTION: 3 Welche der folgenden Eigenschaften zeichnet sich dadurch aus, dass ein Angreifer versucht, die Mitarbeiterhierarchie einer Organisation abzubilden, um gezielte E-Mails zu senden?**A.** Spear Phishing**B.** Identitätswechsel**C.** Walfang**D.** Eskalation von Berechtigungen**Answer: C**
Explanation: A whaling attack is targeted at company executives. Mapping out an organization's staff hierarchy to determine who the people at the top are is also part of a whaling attack. Whaling is a specific kind of malicious hacking within the more general category of phishing, which involves hunting for data that can be used by the hacker. In general, phishing efforts are focused on collecting personal data about users. In whaling, the targets are high-ranking bankers, executives or others in powerful positions or job titles. Hackers who engage in whaling often describe these efforts as "reeling in a big fish," applying a familiar metaphor to the process of scouring technologies for loopholes and opportunities for data theft. Those who are engaged in whaling may, for example, hack into specific networks where these powerful individuals work or store sensitive data. They may also set up keylogging or other malware on a work station associated with one of these executives. There are many ways that hackers can pursue whaling, leading C-level or top-level executives in business and government to stay vigilant about the possibility of cyber threats.

NEW QUESTION: 4 Refer to the Exhibit. A vSphere 6.x Standard Switch is configured with 4 virtual machine portgroups, as shown in the exhibit. Which portgroup would be utilized by default when creating a new virtual machine?**A.** DMZ Network**B.** VM Network**C.** Virtual Machine Network**D.** Access Network**Answer: D**
Explanation: Explanation/Reference: Explanation: The answer is Access Network because it selects the portgroup based on the first letter according to the alphabet
