It can help you pass the exam successfully.

**NEW QUESTION: 1** CORRECT TEXT Scenario: A Citrix Engineer at CCH needs to provide owners of a specific application with delegated administrative rights to perform specific tasks on their application and the servers hosting their application. The application owners need permissions to do the following: -Add and remove the application from a Delivery Group -Create and delete applications -Edit application properties -Add and remove the application from Maintenance Mode -Perform power operations on Windows Server machines Permissions should be specifically granted to the CCHMedAppAdmins group and assigned to a custom scope. Tasks: 1. Create a custom role named MedAppAdmins. 2. Assign only the required permissions to the newly created role. 3. Create a custom scope named MedAppScope for the application owners' delivery group. 4. Assign this role to the CCHMedAppAdmins group. 5. Assign this group to the newly created scope: MedAppScope. **Answer:** Explanation: Find the solution with all steps below. Explanation: To create a custom role 1. In Studio, click Configuration > Administrators in the left pane, then click the Roles tab in the middle pane. A list of existing roles appears. 2. In the Actions pane, click Create new Role. 3. Type a name and description for the role. 4. For each object type that you want this role to have permissions for, select the object type, then select the permissions. 1. Click Save. To create a scope 1. In Studio, click Configuration > Administrators in the left pane, then click the Scopes tab in the middle pane. A list of existing scopes appears. 2. In the Actions pane, click Create new Scope. 3. Type a name (for example, 'Sales') and a description (for example, 'Delivery Groups used by Sales') for the scope. 4. Select object types or specific objects: a. To select all objects of a particular type (for example, Delivery Groups), select the object type. b. To select specific objects, expand the type, then select the individual objects (for example, individual Delivery Groups used by the Sales team). 5. Click Save.

**NEW QUESTION: 2** You are developing an ASP.NET Core website that can be used to manage photographs which are stored in Azure Blob Storage containers. Users of the website authenticate by using their Azure Active Directory (Azure AD) credentials. You implement

role-based access control (RBAC) role permission on the containers that store photographs. You assign users to RBAC role. You need to configure the website's Azure AD Application so that user's permissions can be used with the Azure Blob containers. How should you configure the application? To answer, drag the appropriate setting to the correct location. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation:
