Which of the below mentioned entries are required in the main route table to allow the instances in VPC to communicate with each other?**A.** Destination : 20.0.0.0/16 and Target : ALL**B.** Destination : 20.0.0.0/0 and Target : ALL**C.** Destination : 20.0.0.0/24 and Target : VPC**D.** Destination : 20.0.0.0/24 and Target : Local**Answer: D** Explanation: Explanation Option A doesn't use standard AWS terminology (you don't route to "VPC"), and because the mask is /24, it would only allow the instances in the private subnet to communicate with each other, not all the instances in the VPC as the question asked. Here's an example VPC route table for a public subnet (i.e. it routes to the IGW). Option D is the correct one.
