NEW QUESTION: 4 When creating a new Cloud Dataproc cluster with the `projects.regions.clusters.create` operation, these four values are required: project, region, name, and _____.
A. label **B.** type **C.** zone **D.** node
Answer: C
Explanation: Explanation
At a minimum, you must specify four values when creating a new cluster with the `projects.regions.clusters.create` operation:
The project in which the cluster will be created
The region to use
The name of the cluster
The zone in which the cluster will be created
You can

specify many more details beyond these minimum requirements. For example, you can also specify the number of workers, whether preemptible compute should be used, and the network settings. Reference:
