**NEW QUESTION: 1**You have an internal network and a perimeter network. On the perimeter network, you deploy two Exchange Server 2013 servers that have the Edge Transport server role installed. On the internal network, you deploy five Exchange Servers that have the Mailbox server role and the Client Access server role installed. You need to recommend a solution to ensure that email messages are received by the organization if the Edge Transport server fails. The solution must ensure that the server are load balanced. What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer. **A.** For each Edge Transport server, create a host (A) record. Create mail exchanger (MX) records that point to the A records. Set the preference of one of the MX records to a value of 11. Set preference of the other MX record to a value of 12. **B.** For each Edge Transport server, create a host (A) record. Create mail exchanger (MX) records that point to the A records. Set the preference of both MX records to a value of 100. **C.** Create a host (A) record named `mail.contoso.com` that contains the IP addresses for both Edge Transport servers. Create a mail exchanger (MX) record that points to `mail.contoso.com`. **D.** Create a mail exchanger (MX) record that points to the IP address of each Edge Transport server. Set the preference of both MX records to a value of 10. **Answer: B**

**NEW QUESTION: 2**A small number of API requests to your microservices-based application take a very long time. You know that each request to the API can traverse many services. You want to know which service takes the longest in those cases. What should you do? **A.** Use Stackdriver Monitoring to look for insights that show when your API latencies are high. **B.** Set timeouts on your application so that you can fail requests faster. **C.** Instrument your application with Stackdriver Trace in order to break down the request latencies at each microservice. **D.** Send custom metrics for each of your requests to Stackdriver Monitoring. **Answer: C**  
Explanation: [Explanation: https://cloud.google.com/trace/docs/overview](https://cloud.google.com/trace/docs/overview)

**NEW QUESTION: 3**An Admin creates a Search Filter for Product Code that has a predefined Filter Value of Green and an operator of "starts with". If the Search Filter is visible, how can sales reps interact with the filter on the Product Selection screen? **A.** Sales reps can replace the text, but are unable to leave the required field blank. **B.** Sales reps can change the operator from "starts with" to "contains". **C.** Sales reps can see the filter, but are unable to alter the filter text. **D.** Sales reps can delete the text to ignore the filter. **Answer: D**
