According to the Standards, which of the following are conditions where the internal audit activity (IAA) may provide risk management consulting? **1.** There is a clear strategy and timeline to migrate risk management responsibility back to management. **2.** The IAA has the final approval on any risk management decisions. **3.** The IAA does not give objective assurance on any part of the risk management framework for which it is responsible. **4.** The nature of services provided to the organization is documented in the internal audit charter. **A.** 2, 3, and 4 only **B.** 1, 2, and 4 only **C.** 1, 3, and 4 only **D.** 1, 2, and 3 only **Answer: C**

NEW QUESTION: 3 **A.** Option C **B.** Option E **C.** Option D **D.** Option A **E.** Option B **Answer: A,C,E**

NEW QUESTION: 4 You are developing a SQL Server Analysis Services (SSAS) tabular project. The model has tables named Invoice Line Items and Products. The Invoice Line Items table has the following columns: Product Id Unit Sales Price The Unit Sales Price column stores the unit price of the product sold. The Products table has the following columns: Product Id Minimum Sales Price The Minimum Sales Price column is available only in the Products table. You add a column named Is Undersell to the Invoice Line Items table. The Is Undersell column must store

a value of TRUE if the value of the Unit Sales Price is less than the value of the Minimum Sales Price. Otherwise, a value of FALSE must be stored. You need to define the Data Analysis Expressions (DAX) expression for the Is Undersell column. Which DAX formula should you use? (Each answer represents a complete solution. Choose all that apply.)
A. =IF([Unit Sales Price]<RELATED(Products[Minimum Sales Price]), TRUE, FALSE)
B. =IF (RELATED(Products[Unit Sales Price])< [Minimum Sales Price], TRUE, FALSE)
C. =IF(LOOKUPVALUE (Products[Unit Sales Price], Products[Product Id], [Product id])< [Minimum Sales price]), TRUE, FALSE)
D. =IF([Unit Sales Price]< LOOKUPVALUE(Products[Minimum Sales Price], Products[Product Id],[Product id]), TRUE, FALSE)
Answer: A,D
Explanation: Explanation/Reference: Explanation: A: RELATED Function Returns a related value from another table. The RELATED function requires that a relationship exists between the current table and the table with related information. You specify the column that contains the data that you want, and the function follows an existing many-to-one relationship to fetch the value from the specified column in the related table. C: The lookupvalue function returns the value in result_columnName for the row that meets all criteria specified by search_columnName and search_value. Syntax: LOOKUPVALUE(<result_columnName>, <search_columnName>, <search_value>[,<search_columnName>, <search_value>]...) Note: The syntax of DAX formulas is very similar to that of Excel formulas, and uses a combination of functions, operators, and values.
