Explanation:The Condition clause can be used to ensure users can only work with resources if they are MFA authenticated.Option B and C are wrong since the aws:MultiFactorAuthPresent clause should be marked as true. Here you are saying that onl if the user has been MFA activated, that means it is true, then allow access.Option D is invalid because the "boor clause

is missing in the evaluation for the condition clause. Boolean conditions let you construct Condition elements that restrict access based on comparing a key to "true" or "false."
