If IT workers have a AD0-E134 certification, better job opportunities and excellent career are waiting for you, WHY CHOOSE Estrukturit AD0-E134 EXAM TRAINING?

NEW QUESTION: 1 Refer to the exhibit. Assuming that the peer is configured correctly and the interface is up, how many neighbors will be seen in the EIGRPv6 neighbor table on this IPv6-only router?
A. one neighbor, which will use a local router-id of 6010. AB8. . /64
B. none, because of the mismatch of timers
C. none, because EIGRPv6 only supports authenticated peers
D. one neighbor, which will use a local router-id of 6020. AB8. . /64
E. none, because there is no EIGRP router ID configured
Answer: E
Explanation: Configuring EIGRP for IPv6 has some restrictions; they are listed below:
- The interfaces can be directly configured with EIGRP for IPv6, without the use of a global IPv6 address. There is no network statement in EIGRP for IPv6.
- The router ID needs to be configured for an EIGRPv6 protocol instance before it can run.
- EIGRP for IPv6 has a shutdown feature. Ensure that the routing process is in "no shut" mode to start running the protocol.
