You can use the version you like and which suits you most to learn our JN0-460 study materials, Try before you buy, and we can ensure a full refund if you lose the exam.

NEW QUESTION: 1You have a Windows 10 Enterprise computer. The computer has a shared folder named C:Marketing. The shared folder is on an NTFS volume. The current NTFS and share permissions are configured as follows. UserA is a member of both the Everyone group and the Marketing group. UserA must access C:Marketing from across the network. You need to identify the effective permissions of UserA to the C:Marketing folder. What permission should you identify?**A. Full Control****B. Read****C. Modify****D. Read and Execute****Answer: C****Explanation:** Explanation/Reference:Explanation:UserA is a member of both the Everyone group and the Marketing group and UserA must access C:Marketing from across the network. When accessing a file locally, you combine the NTFS permissions granted to your account either directly or by way of group membership. The 'least' restrictive permission is then the permission that applies. In this question, the NTFS permission is the least restrictive of Read/Execute and Modify... so Modify is the effective permission. When accessing a folder or file across the network, you combine the effective NTFS permissions (Modify in this case) with the effective Share permissions granted to your account either directly or by way of group membership (Full Control in this case). The 'most' restrictive permission is then the permission that applies. Modify is more restrictive than Full Control so Modify is the effective permission.

NEW QUESTION: 2Which command configures an HSRP group to become a slave of another HSRP group?**A. standby group track****B. standby follow****C. standby group backup****D. standby slave****Answer: B**

NEW QUESTION: 3Which table specifies that WebRFC users can log on using the AGate's SNC-protected connection?**A. USRACLEXT****B. UYTGFE SDK****C. USRACJFFXL****Answer: A**
