NEW QUESTION: 1A. Option DB. Option CC. Option BD. Option GE. Option FF. Option EG. Option AH. Option H
Answer: G Explanation: Original Answer is A and I'll agree as it's the only one using Transactional Replication. Must be to do with "You need to ensure that data changes are sent to a non-SQL Server database server in near real time. "

NEW QUESTION: 2 For which of the following scenarios would you activate the end-user logon function?
A. A user has successfully completed validation testing.
B. A user has no access to the Access Control system and needs to submit a request for access.
C. A user has signed a non-disclosure agreement (NDA).
D. A user has been promoted to manager and needs to log on to the Access Control system to approve a pending request.
Answer: B

NEW QUESTION: 3 DRAG DROP You are designing a SAM improvement program for a customer. You must reduce license consumption for an engineering application. The application is deployed to computers in every department where a user has requested the application. The strategy results in new, but unnecessary deployments of the application every month, exposing the company to additional license costs. You need to create a solution that meets the following requirements: The solution must minimize unnecessary application deployment. The solution must minimize calls to the help desk. You need to recommend a deployment strategy for the engineering application by using System Center Configuration Manager (ConfigMgr). Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer: Explanation: Step 1: package and program Step 2: User collection Step 3: Available. You need to create a solution that meets the following requirements: References: <https://technet.microsoft.com/en-us/library/gg682178.aspx>
