NEW QUESTION: 1CORRECT TEXT Which of the following statements must NOT be used to exit a BEGIN block?**A. ENDB. GOTO C. RETURN D. LEAVE****Answer: D**

NEW QUESTION: 2DRAG DROP You have an Exchange Server 2013 organization. You create a script named New-CustomMailbox.ps1 to create mailboxes based on your company's requirements. You create a role group named Mailbox Provisioning. You need to ensure that the members of Mailbox Provisioning can create new mailboxes only by using New-CustomMailbox.ps1. In which sequence should you run the commands? (To answer, move all of the commands from the list of commands to the answer area and arrange them in the correct order.)**Answer:** Explanation:

NEW QUESTION: 3 You have an Exchange Server 2013 organization. You plan to deploy Exchange ActiveSync for mobile devices. Each mobile device will be authenticated by using certificates issued by an internal certification authority (CA). You need to configure the organization to authenticate the mobile devices by using the certificates. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)**A.** From Internet Information Services (IIS) Manager on each Client Access server, enable Active Directory Client Certificate Authentication.**B.** From Exchange Admin Center, configure the Microsoft-Server-ActiveSync virtual directory to require client certificates.**C.** From Internet Information Services (IIS) Manager on each Client Access server, configure the Microsoft-Server-ActiveSync virtual directory to require client certificates.**D.** From Internet Information Services (IIS) Manager on each Mailbox server, enable Active Directory Client Certificate Authentication.**Answer: A, B** Explanation: Explanation/Reference: Explanation: B: After you've installed the Exchange 2013 Client Access server, there are a variety of configuration tasks that you can perform. Although the Client Access server in Exchange 2013 doesn't handle processing for the client protocols, several settings need to be applied to the Client Access server, including virtual directory settings and certificate settings. C: Configure certificate-based authentication for Exchange ActiveSync <http://blogs.technet.com/b/exchange/archive/2012/11/28/configure-certificate-based-authentication-forexchange-activesync.aspx> Client Access Server Configuration To configure the Client Access server to enforce certificate based authentication: 1. Verify if Certificate Mapping Authentication is installed on the server. Right click on Computer in the start menu and choose Manage. Expand Roles and click on Web Server (IIS) Scroll down to the Role Services section. Under the Security section you should see Client Certificate Mapping Authentication installed. If you don't see Client Certificate Mapping Authentication installed, click add Role Services > (scroll) Security and select Client Certificate Mapping Authentication and then click Install. Reboot your server. References:
