**Client Access Server Configuration**  
To configure the Client Access server to enforce certificate based authentication:  
1. Verify if Certificate Mapping Authentication is installed on the server. Right click on Computer in the start menu and choose Manage. Expand Roles and click on Web Server (IIS) Scroll down to the Role Services section. Under the Security section you should see Client Certificate Mapping Authentication installed. If you don't see Client Certificate Mapping Authentication installed, click add Role Services > (scroll) Security and select Client Certificate Mapping Authentication and then click Install. Reboot your server.
