And we can say that Professional-Cloud-Security-Engineer test questions won't give you any unsatisfactory experience.

**NEW QUESTION: 1** Refer to the exhibit. Will redistributed RIP routes from OSPF Area 2 be allowed in Area 1? **A.** Because Area 1 is an NSSA, redistributed RIP routes will not be allowed. **B.** Redistributed RIP routes will be allowed in Area 1 because they will be changed into type 5 LSAs in Area 0 and passed on into Area 1. **C.** Redistributed RIP routes will be allowed in Area 1 because they will be changed into type 7 LSAs in Area 0 and passed on into Area 1. **D.** RIP routes will be allowed in Area 1 only if they are first redistributed into EIGRP. **E.** Because NSSA will discard type 7 LSAs, redistributed RIP routes will not be allowed in Area 1. **Answer: A**

**NEW QUESTION: 2** You are using AFF storage with the NVMe storage protocol on your Linux clients. In this scenario, which NVMe feature must be present and enabled for the client to see storage failover happen? **A.** Asymmetric Logical Unit Access (ALUA) **B.** Multi-Path I/O (MPIO) **C.** NVMe Qualified Name (NQN) **D.** Asymmetric Namespace Access (ANA) **Answer: B**

**NEW QUESTION: 3** Assume you are working as the project manager on the first project in your company to use the critical chain approach to scheduling. You are a PMP@ and also are certified in critical chain. You are getting ready for a performance review with your Governance Board, and you can expect they will ask questions about \_\_\_\_\_ **A.** Performance to date since the past review meeting **B.** Schedule risk **C.** The buffer needed and buffer remaining **D.** The magnitude of variance against the schedule baseline **Answer: C** Explanation: Critical chain is an approach in scheduling in which the project team can place buffers on any project schedule path to account for limited resources and project uncertainties. During a performance review, comparing the amount of buffer remaining to the amount of buffer needed to protect the delivery date can help to determine schedule status.
