NEW QUESTION: 1You have recently joined a startup company building sensors to measure street noise and air quality in urban areas. The company has been running a pilot deployment of around 100 sensors for 3 months each sensor uploads 1KB of sensor data every minute to a backend hosted on AWS. During the pilot, you measured a peak of 10 IOPS on the database, and you stored an average of 3GB of sensor data per month in the database. The current deployment consists of a load-balanced auto scaled Ingestion layer using EC2 instances and a PostgreSQL RDS database with 500GB standard storage. The pilot is considered a success and your CEO has managed to get the attention of some potential investors. The business plan requires a deployment of at least 100K sensors which needs to be supported by the backend. You also need to store sensor data for at least two years to be able to compare year over year improvements. To secure funding, you have to make sure that the platform meets these requirements and leaves room for further scaling. Which setup will meet the requirements?**A.** Add an SQS queue to the ingestion layer to buffer writes to the RDS instance**B.** Keep the current architecture but upgrade RDS storage to 3TB and 10K provisioned IOPS**C.** Ingest data into a DynamoDB table and move old data to a Redshift cluster**D.** Replace the RDS instance with a 6 node Redshift cluster with 96TB of storage**Answer: D**

NEW QUESTION: 2Welche Art der drahtlosen Verschlüsselung wird für WPA2 im Pre-Shared-Key-Modus verwendet?**A.** AES-256**B.** TKIP mit RC4**C.** AES-128**D.** RC4**Answer: A**
Explanation: We can see in this picture we have to type 64 hexadecimal characters (256 bit) for the WPA2 passphrase so we can deduce the encryption is AES-256, not AES-128.

NEW QUESTION: 3Universal Containers wants to implement a sales methodology that focuses on identifying customer's challenges and addressing them with its offerings. Which sales methodology is described above?**A.** Direct selling**B.** Relationship selling**C.** Solution selling**D.** Target account selling**Answer: C**

NEW QUESTION: 4 Refer to the exhibit. Cisco 400-051 Exam In this high-availability Cisco IM and Presence deployment with three subclusters, the first user is assigned to server 1A; the second user is assigned to server 2A; and the third user is assigned to server 3A. Assume that the Cisco IM and Presence is set to Active/Standby mode, to which server should the fourth user be assigned? **A. 3B. 3C. 1BD. 2AE. 1A**
Answer: E
Explanation: This deployment model provides the same level of redundancy and high availability as outlined in the "Balanced Redundant High-Availability Deployment" section in this chapter. The only difference is that users are not deployed in a balanced fashion, but rather all reside on the primary server in the subcluster, and the backup server is there as a standby option if a node failure occurs.
