NEW QUESTION: 1 Sie haben ein Microsoft 365 Enterprise-Abonnement. Sie erstellen eine Kennwortrichtlinie, wie in der folgenden Abbildung gezeigt. Verwenden Sie die Dropdown-Menüs, um die Antwortauswahl auszuwählen, die die einzelnen Anweisungen anhand der in der Grafik angezeigten Informationen vervollständigt. **HINWEIS:** Jede richtige Auswahl ist einen Punkt wert. **Answer:** Explanation: Explanation By default, smart lockout locks the account from sign-in attempts for one minute after 10 failed attempts. In this question, the lockout threshold is 5 failed attempts. The account locks again after each subsequent failed sign-in attempt, for one minute at first and longer in subsequent attempts. Password evaluation goes through several steps including normalization and Substring matching which is used on the normalized password to check for the user's first and last name as well as the tenant name. The next step is to identify all instances of banned passwords in the user's normalized new password. Then: * Each banned password that is found in a user's password is given one point. * Each remaining unique character is given one point. * A password must be at least five (5) points for it to be accepted. Conto\$01Pa\$\$word contains two banned passwords and no remaining unique characters so is given a score of 2 points. This is less than the required 5 points so will be rejected. Pa\$\$w0rd contains a banned password and no remaining unique characters so is given a score of 1 point. This is less than the required 5 points so will be rejected. AzureAD!!111 contains a banned password (AzureAD!!) and has three remaining characters. However, the remaining characters are all the same (they're all 1s) so that is only one unique character. So that password will be given a score of 2. One for the banned password and 1 for the unique character. This is less than the required 5 points so will be rejected. Password11 does not contain a banned password. Password11 contains 10 characters. However, there are two 's' and two '1' so there are 8 unique characters. Therefore, the password will be given a score of 8 points. This is more than the required 5 points so the password will be accepted. NEW QUESTION: 2 A company has decided to store its critical data on the AWS Cloud. Newly uploaded data is frequently accessed for a period of one month, after which the data is no longer frequently accessed. However, there is a requirement for older objects with a specific prefix to be accessed within milliseconds. What services and features should the company use to meet this requirement in a durable, available, and cost-effective manner? **A.** Use the S3 Standard storage class to store the objects for the initial month. After one month, use lifecycle transition policies to change the storage class for objects with the prefix to S3 STANDARD_IA and the rest of the data to Amazon Glacier **B.** Use the S3 Standard storage class to store the objects for the initial month. After one month, use lifecycle transition policies to change the

storage class for all data to Amazon Glacier**C**. Use the S3 STANDARD_IA storage class to store the objects for the initial month. After one month, use lifecycle transition policies to change the storage class for all data to S3 ONEZONE_IAD. Use the S3 STANDARD_IA storage class to store the objects for the initial month. After one month, use lifecycle transition policies to change the storage class for the objects with the prefix to S3 ONEZONE_IA and the rest of the data to Amazon Glacier**Answer: C**

NEW QUESTION: 3Each action may be used once, more than once, or not at all. You mayA company plans to use Operations Management Suite (OMS) to track configuration changes within virtual machines (VMs).You need to determine the change types that report differences when changes are found.Which action for each source type is performed by the OMS agent? To answer, drag the appropriate action to the data source. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation:Explanation
