**NEW QUESTION: 2**An organization is considering services it can successfully provide to its customers. One of the services, however, is deemed to be difficult to offer with a high degree of certainty of success. The organization has decided not to offer the service because of the risk in offering the service, and failing. What risk response is used in this scenario?**A.** Avoidance**B.** Sharing**C.** Transference**D.** Mitigation**Answer: A**

**NEW QUESTION: 3**You are analyzing the memory usage of a Microsoft SQL Server instance. You need to obtain the information described on the following table. Which performance counter should you use for each requirement? To answer, drag the appropriate performance counters

to the correct requirements. Each performance counter may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Requirement1: SQL Server: Memory Manager: Total Server Memory (KB) This counter specifies the amount of memory the server has committed using the memory manager. Requirement2: SQL Server: Memory Manager: Granted Workspace Memory (KB) Specifies the total amount of memory currently granted to executing processes, such as hash, sort, bulk copy, and index creation operations. Requirement3: Process: working Set Each time a process is created, it reserves the minimum working set size for the process. The virtual memory manager attempts to keep enough memory for the minimum working set resident when the process is active, but keeps no more than the maximum size. References:
