NEW QUESTION: 3**A.** Option B**B.** Option D**C.** Option C**D.** Option A**Answer: D****Explanation:**
Explanation Azure Backup provides backup for virtual machines - created through both the

classic deployment model and the Azure Resource Manager deployment model - by using custom-defined backup policies in a Recovery Services vault. With the release of backup policy management, customers can manage backup policies and model them to meet their changing requirements from a single window. Customers can edit a policy, associate more virtual machines to a policy, and delete unnecessary policies to meet their compliance requirements.
