Where can I find manual for ACA Campus Access Associate exam simulator?

**NEW QUESTION: 1A. Option DB. Option CC. Option BD. Option AE. Option EAnswer: A**

**NEW QUESTION: 2**Which of the following can be used by a security administrator to successfully recover a user's forgotten password on a password protected file?**A. Social engineeringB. Cognitive passwordC. Password sniffingD. Brute forceAnswer: D**  
Explanation: Section: Threats and VulnerabilitiesExplanation/Reference:Explanation:One way to recover a user's forgotten password on a password protected file is to guess it. A brute force attack is an automated attempt to open the file by using many different passwords.A brute force attack is a trial-and-error method used to obtain information such as a user password or personal identification number (PIN). In a brute force attack, automated software is used to generate a large number of consecutive guesses as to the value of the desired data. Brute force attacks may be used by criminals to crack encrypted data, or by security analysts to test an organization's network security.A brute force attack may also be referred to as brute force cracking.For example, a form of brute force attack known as a dictionary attack might try all the words in a dictionary. Other forms of brute force attack might try commonly-used passwords or combinations of letters and numbers.An attack of this nature can be time- and resource-consuming. Hence, the name "brute force attack"; success is usually based on computing power and the number of combinations tried rather than an ingenious algorithm.

**NEW QUESTION: 3**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You need to monitor the environment.You create a performance data collector set.Does this solution meet the goal?**A. NoB. YesAnswer: B**

**NEW QUESTION: 4**Your network contains a server named Server1 that runs Windows Server 2008 R2.You create an Active Directory Lightweight Directory Services (AD LDS) instance on Server1.You need to create an additional AD LDS application directory partition in the existing instance.Which tool should you use?**A. DsaddB. DsmodC. LdpD. AdaminstallAnswer: C**  
Explanation:<http://technet.microsoft.com/en-us/library/cc755251.aspx> Create an Application Directory Partition You use Ldp.exe to add a new application directory partition to an existing instance of Active Directory Lightweight Directory Services (AD LDS).
