NEW QUESTION: 1

どのように火力は悪質な電子メールの添付ファイルをブロックすることができますか？ **A.**

これは、不審な電子メールメッセージを確認するために、管理者にアラートを送信します。 **B.**

これは、既知の不正なURLのインバウンド電子メールメッセージをスキャンします。 **C.**

これは、ファイルポリシーを通過するトラフィックを送信します。 **D.**

これは、外部のシグニチャエンジンに電子メール要求を転送します。 **Answer: C** Explanation: A file policy is a set of configurations that the system uses to perform advanced malware protection and file control, as part of your overall access control configuration. A file policy, like its parent access control policy, contains rules that determine how the system handles files that match the conditions of each rule. You can configure separate file rules to take different actions for different file types, application protocols, or directions of transfer. You can associate a single file policy with an access control rule whose action is Allow, Interactive Block, or Interactive Block with reset. The system then uses that file policy to inspect network traffic that meets the conditions of the access control rule. Source:
