Our website is a professional site providing high-quality and technical products for examinees to pass their AVIXA Certification CTS-D exams.

NEW QUESTION: 1An administrator account is granted the CREATE SESSION and SET CONTAINER system privileges. A multitenant container database (CDB) instance has the following parameter set: `THREADED_EXECUTION = FALSE` Which four statements are true about this administrator establishing connections to root in a CDB that has been opened in read only mode? **A.** You can connect by using OS authentication. **B.** You can connect as a local user by using the connect statement. **C.** You can connect as a local user by using the SET CONTAINER statement. **D.** You can connect by using a Net Service name. **E.** You can connect as a common user by using the connect statement. **F.** You can connect by using easy connect. **Answer: A,C,D,F**
Explanation: *The choice of threading model is dictated by the `THREADED_EXECUTION` initialization parameter. `THREADED_EXECUTION=FALSE` : The default value causes Oracle to run using the multiprocess model. `THREADED_EXECUTION=TRUE` : Oracle runs with the multithreaded model. *OS Authentication is not supported with the multithreaded model. *`THREADED_EXECUTION` When this initialization parameter is set to `TRUE`, which enables the multithreaded Oracle model, operating system authentication is not supported. Attempts to connect to the database using operating system authentication (for example, `CONNECT / AS SYSDBA` or `CONNECT /`) when this initialization parameter is set to `TRUE` receive an `ORA-01031 "insufficient privileges"` error. **F:** The new SET CONTAINER statement within a call back function: The advantage of SET CONTAINER is that the pool does not have to create a new connection to a PDB, if there is an existing connection to a different PDB. The pool can use the existing connection, and through SET CONTAINER, can connect to the desired PDB. This can be done using: `ALTER SESSION SET CONTAINER=<PDB Name>` This avoids the need to create a new connection from scratch.

NEW QUESTION: 2 **A.** Option C **B.** Option B **C.** Option D **D.** Option A **Answer: A**

NEW QUESTION: 3 What are two routing requirements for a device to communicate with another device? (Choose two.) **A.** routing information on participating Layer 3 devices **B.** hosts on the same Layer 3 broadcast domain **C.** hosts on the same Layer 2 broadcast domain **D.** end-to-end communications path **Answer: A,D**

NEW QUESTION: 4 When an Alcatel-Lucent 7750 SR receives a BGP route with an AS Path loop, what action is taken by default? **A.** The route is ignored. **B.** The route is flagged as invalid and placed in the RIB-Out. **C.** The route is flagged as invalid and placed in the RIB-In. **D.** The route is flagged as invalid and placed in the LOC-RIB. **Answer: C**
