the study guide contains 1610 pages which i found [1z1-084 Latest Exam Experience](#) to be very helpful, Real exam questions and answers - verified by Microsoft experts.

NEW QUESTION: 1At which level do you active pick denial?Please choose the correct answer.
Response:**A.** delivery document type level**B.** warehouse number level**C.** process step level**D.** delivery item type level**Answer: B**

NEW QUESTION: 2A. Option D**B.** Option B**C.** Option C**D.** Option A**Answer: D**

NEW QUESTION: 3You have been tasked with designing a "get account" SOA Service. The source data for the service resides in a legacy system that is only accessible via MQ-Series request and response queues. The service consumers have requested a synchronous interface. What integration pattern should the SOA Service employ and why?**A.** The SOA Service should implement a synchronous "get account" method because that is what the service consumers have requested. A new synchronous interface to the legacy system should be created.**B.** The SOA Service should implement a synchronous "get account" method because that is what the service consumers have requested. The SOA Service should use the synchronous-to-asynchronous bridging pattern and use the existing interface to the legacy system.**C.** The SOA Service should implement a synchronous "get account" method because that is what the service consumers have requested. The SOA Service should use the store-and-forward pattern and use the existing interface to the legacy system.**D.** The SOA Service should implement an asynchronous "get account" method because that matches the legacy system access provided.**E.** The SOA Service should implement two synchronous methods. The first method is a "send account request" and the second method is a "get account response." This meets the synchronous interface request of the service consumers while matching the existing interface to the legacy system.**Answer: A**
