After all, you are the main beneficiary.

NEW QUESTION: 1What is the minimum amount of memory required to support 64-bit Indexing?**A. 16GB****B. 8GB****C. 4GB****D. 2GB****Answer: B**

NEW QUESTION: 2Which two statements are true about Flex ASM in a Flex Cluster?**A. Hub nodes with connections from multiple leaf nodes must run an ASM instance.****B. Instances of ASM-based databases on hosts that have no ASM instance running, require Flex ASM.****C. ACFS may only be configured on a hub node running an ASM instance.****D. Oracle databases from releases older than 12c cannot use Flex ASM.****E. Flex ASM requires that I/Os requests be sent through an ASM Proxy Instance, regardless of database and ASM instance placement in a cluster.****Answer: A,C****Explanation:**B: Oracle Automatic Storage Management Cluster File System (Oracle ACFS) can only be run on the hub nodes, not the leaf nodes. Architecturally Oracle Flex Cluster comprises of a Hub and Leaf architecture where in only the Hub nodes will only have direct access to Oracle Cluster Registry (OCR) and Voting Disk (VD).E: application can access the database via Leaf nodes without ASM instance NOT running on Leaf nodes. The connection to the database is through Hub making it transparent for the application.

NEW QUESTION: 3Your project contains many tasks that have dependencies and result in independent networks of tasks. You need to ensure that you can view critical tasks on all independent networks of tasks within the project. What should you do?**A. View the project's Gantt chart and apply the Critical filter.****B. On the Advanced tab of the Microsoft Project 2010 options, modify the 'Tasks are critical if slack is less than or equal to' option.****C. On the Advanced tab of the Microsoft Project 2010 options, select the Calculate multiple critical paths check box.****D. View the project's Gantt chart and apply the Critical group.****Answer: C****Explanation:** You can calculate and display a critical path for each independent network of tasks within the project: Click the File tab, and then click Options. In the Project Options dialog box, click Advanced, and then select the Calculate multiple critical paths check box. By default, Project sets the late finish date for tasks without successors or constraints to be the project finish date. If you choose to calculate multiple critical paths, Project sets the late finish date for these tasks to be their early finish date, making the task critical.

NEW QUESTION: 4What are the log collection methods of FusionAccess? (Multiple choice)**A. Use FusionCare tool to get logs****B. Use the "Log Extraction" function on TCM to obtain logs remotely****C. Use Huawei vDesk to collect user virtual logs****D. Obtain logs manually through WinSCP****Answer: A,B,C,D**
