NEW QUESTION: 1A. Option B**B.** Option C**C.** Option A**D.** Option D**Answer: D****Explanation:**Auto Scaling performs various processes, such as Launch, Terminate, add to Load Balancer etc. The user can also suspend the individual process. The AddToLoadBalancer process type adds instances to the load balancer when the instances are launched. If this process is suspended, Auto Scaling will launch the instances but will not add them to the load balancer. When the user resumes this process, AutoScaling will resume adding new instances launched after resumption to the load balancer. However, it will not add running instances that were launched while the process was suspended; those instances must be added manually.**Reference:** http://docs.aws.amazon.com/AutoScaling/latest/DeveloperGuide/US_SuspendResume.html

NEW QUESTION: 2Regulatory and legislative bodies are among the important environmental forces in the health plan industry. The following statements are about such regulation and legislation.
