**NEW QUESTION: 3** To specify the node name for the NAS file server when processing NAS file systems, use the NASNODENAME option on the command line, or place in which file? **A.** Client options file **B.** Backup copy group **C.** Include/exclude list **D.** Server options file **Answer: A**  
Explanation: Use the nasnodename option to identify the NAS file server. Place the nasnodename option in your client system-options file (dsm.sys). The value in the client system-options file is the default, but this value can be overridden on the command line. If the nasnodename option is not specified in the client system-options file, you must specify this option on the command line when processing NAS file systems.
