Firstly, you will learn many useful knowledge and skills from our CIPT exam guide, which is a valuable asset in your life.

**NEW QUESTION: 1** アカウンティング半径にどのタイプのアカウンティングを実装できますか？ **A.** user **B.** attribute **C.** network **D.** device **Answer: A,D**

**NEW QUESTION: 2** A Developer has created a software package to be deployed on multiple EC2 instances using IAM roles. What actions could be performed to verify IAM access to get records from Amazon Kinesis Streams? (Select TWO.) **A.** Perform a get action using the --dry-run argument. **B.** Query Amazon EC2 metadata for in-line IAM policies. **C.** Validate the IAM role policy with the IAM policy simulator. **D.** Use the AWS CLI to retrieve the IAM group. **E.** Request a token from AWS STS, and perform a describe action. **Answer: A,C** **Explanation:** Refer AWS documentation - EC2 API & IAM Testing Policies DryRun Checks whether you have the required permissions for the action, without actually making the request. If you have the required permissions, the request returns DryRunOperation; otherwise, it returns UnauthorizedOperation. With the IAM policy simulator, you can test and troubleshoot IAM and resource-based policies in the following ways: \* Test policies that are attached to IAM users, groups, or roles in your AWS account. If more than one policy is attached to the user, group, or role, you can test all the policies, or select individual policies to test. You can test which actions are allowed or denied by the selected policies for specific resources. \* Test policies that are attached to AWS resources, such as Amazon S3 buckets, Amazon SQS queues, Amazon SNS

topics, or Amazon Glacier vaults.\* If your AWS account is a member of an , then you can test the impact of organization control policies on your IAM policies and resource policies.\* Test new policies that are not yet attached to a user, group, or role by typing or copying them into the simulator. These are used only in the simulation and are not saved. Note: you cannot type or copy a resource-based policy into the simulator. To use a resource-based policy in the simulator, you must include the resource in the simulation and select the check box to include that resource's policy in the simulation.\* Test the policies with selected services, actions, and resources. For example, you can test to ensure that your policy allows an entity to perform the ListAllMyBuckets, CreateBucket, and DeleteBucket actions in the Amazon S3 service on a specific bucket.\* Simulate real-world scenarios by providing context keys, such as an IP address or date, that are included in Condition elements in the policies being tested.\* Identify which specific statement in a policy results in allowing or denying access to a particular resource or action.

**NEW QUESTION: 3**An app builder needs to change the data types of a few custom fields. The appbuilder is not able to delete and recreate any of the fields, nor modify any apexcode. Which data type change will require the app builder to perform additional steps in order to retain existing functionality?**A.** In an apex class from number to text**B.** As an external ID from number to text**C.** In lead conversion from number to text**D.** Changing the data type of a field used in a report from text to an encrypted field**Answer: C**

**NEW QUESTION: 4****A.** Option **A****B.** Option **C****C.** Option **B****D.** Option **E****E.** Option **F****F.** Option **D****Answer: C,E,F**Explanation:The ports on the switch are not up indicating it is a layer 1 (physical) problem so we should check cable type, power and how they are plugged in.
