The second is the all-round services, our 300-510 pass-sure guide updates the latest information every day to make the candidates to catch the key knowledge and help them get through the 300-510 test successfully with full preparation.

Do you have discounts for the exam study **300-510 Exam Objectives** material, This is factual proof of the incomparable quality of our products.

NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You create a table named Products by running the following Transact-SQL statement:You have the following stored procedure:You need to modify the stored procedure to meet the following new requirements:-Insert product records as a single unit of work.-Return error number 51000 when a product fails to insert into the database.- If a product record insert operation fails, the product information must not be permanently written to the database.Solution: You run the following Transact-SQL statement:Does the solution meet the goal?**A. No****B. Yes****Answer: A**
Explanation:A transaction is correctly defined for the INSERT INTO ..VALUES statement, and if there is an error in the transaction it will be caught and the transaction will be rolled back. However, error number 51000 will not be returned, as it is only used in an IF @ERROR = 51000 statement.Note: @@TRANCOUNT returns the number of BEGIN TRANSACTION statements that have occurred on the current connection.References:

NEW QUESTION: 2Ein Projektmanager bereitete das Basisbudgetmodell vor, um eine hohe Leistung zu erzielenanpassbare Softwarelösung. Die Lösung wird in mehreren Ländern mit signifikant unterschiedlichen Kulturen geliefert und über Phasen hinweg inszeniert.Was soll der Projektmanager als nächstes tun?**A.** Bitten Sie das Projektmanagementbüro (PMO), den Entwurf des Haushaltsplans zu überprüfen.**B.** Überschätzen Sie die Kosten und unterschätzen Sie die Einnahmen, um die Auswirkungen verschiedener kultureller Elemente zu berücksichtigen.**C.** Überprüfen Sie das Basismodell mit den Teamleitern in jedem Land, um ein unabhängiges Budget für jede Phase zu erstellen.**D.** Wenden Sie das operative Budgetierungsmodell des Unternehmens an.**Answer: C**

NEW QUESTION: 3Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have an Azure

Storage v2 account named storage1. You plan to archive data to storage1. You need to ensure that the archived data cannot be deleted for five years. The solution must prevent administrators from deleting the data. Solution: You create an Azure Blob storage container, you configure a time-based retention policy, and you lock the policy. Does this meet the goal? **A. Yes**. **B. No**. **Answer: A** Explanation: Explanation Time-based retention policy support: Users can set policies to store data for a specified interval. When a time-based retention policy is set, blobs can be created and read, but not modified or deleted. After the retention period has expired, blobs can be deleted but not overwritten. Note: Immutable storage for Azure Blob storage enables users to store business-critical data objects in a WORM (Write Once, Read Many) state. This state makes the data non-erasable and non-modifiable for a user-specified interval. For the duration of the retention interval, blobs can be created and read, but cannot be modified or deleted. Immutable storage is available for general-purpose v2 and Blob storage accounts in all Azure regions. Reference: <https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-immutable-storage>
