There's no need for you to test several times.

NEW QUESTION: 1 A database exists as a read-intensive server that is operating with `query_cache_k_type = DEMAND`. The database is refreshed periodically, but the resultset size of the queries does not fluctuate. Note the following details about this environment: A web application uses a limited set of queries. The Query Cache hit rate is high. All resultsets fit into the Query Cache. All queries are configured to use the Query Cache successfully. The response times for queries have recently started to increase. The cause for this has correctly been identified as the increase in the number of concurrent users accessing the web service. Based solely on the information provided, what is the most likely cause for this slowdown at the database level? **A.** Mutex contention on the Query Cache is forcing the queries to take longer due to its single-threaded nature. **B.** The Query Cache is pruning queries due to an increased number of requests. **C.** The average resultset of a query is increasing due to an increase in the number of users requiring SQL statement execution. **D.** `Query_cache_min_res_unit` has been exceeded, leading to an increased performance overhead due to additional memory block lookups. **Answer: A**

NEW QUESTION: 2 A company has 100 client computers that run Windows 8. The client computers are connected to a corporate private network. Users are currently unable to connect from their home computers to their work computers by using Remote Desktop. You need to ensure that users can remotely connect to their office computers by using Remote Desktop. Users must not be able to access any other corporate network resource from their home computers. What should you do? **A.** Configure the Remote Desktop Gateway IP address in the advanced Remote Desktop Connection settings on each client. **B.** Configure a DirectAccess connection. **C.** Configure the local resource settings of the Remote Desktop connection. **D.** Configure a Virtual Private Network connection. **Answer: A** Explanation: Section: Configure Remote Access and Mobility (14%) Explanation/Reference: See Understanding Authorization Policies for Remote Desktop Gateway: <http://technet.microsoft.com/enus/library/cc731435.aspx> RD RAPs will enable us to control remote user access to internal network resources. With RD CAPs we can control which Users or Computers can connect via RDP.

NEW QUESTION: 3 The command to enable CHAP authentication in PPP is: `ppp chap authentication`. **A.** False **B.** True **Answer: A**
