**Answer: B**

**NEW QUESTION: 3** Which describes risk appetite?**A.** The risks to the expected benefits**B.** The budget set aside for potential changes to the scope of the project**C.** A common set of risk categories, risk scales and evaluation techniques**D.** An organization's unique attitude towards risk-taking**Answer: D**

**NEW QUESTION: 4** Information for detecting unauthorized input from a terminal would be BEST provided by the:**A.** automated suspense file listing.**B.** transaction journal.**C.** user error report.**D.** console log printout.**Answer: B**  
Explanation:Explanation/Reference:Explanation:The transaction journal would record all transaction activity, which then could be compared to the authorized source documents to identify any unauthorized input. A console log printout is not the best, because it would not record activity from a specific terminal. An automated suspense file listing would only list transaction activity where an edit error occurred, while the user error report would only list input that resulted in an edit error.
