毎日のログが独自のフォルダーにあるように、ログファイルをフォルダーに移動しますD.

ワーカーノードの数を増やすE. mapreduce.map.memoryパラメーターの値を増やします**Answer:**

**B,C**Explanation:ExplanationA: Typically, analytics engines such as HDInsight and Azure Data Lake Analytics have a per-file overhead.If you store your data as many small files, this can negatively affect performance. In general, organize your data into larger sized files for better performance (256MB to 100GB in size). Some engines and applications might have trouble

efficiently processing files that are greater than 100GB in size. C: For Hive workloads, partition pruning of time-series data can help some queries read only a subset of the data which improves performance. Those pipelines that ingest time-series data, often place their files with a very structured naming for files and folders. Below is a very common example we see for data that is structured by date: DataSetYYYYMMDDdatafile\_YYYY\_MM\_DD.tsv Notice that the datetime information appears both as folders and in the filename.
