G. It provides flexibility because Oracle homes in a shared APPL_TOP are not required to be at the same patch level.
Answer: B,C,E

NEW QUESTION: 4 A SELECT statement without an ORDER BY clause return some rows. Which statement is always true about the order of the returned results?
A. The results are in the order inserted.
B. The results are not in a set order.
C. The results are in descending order.
D. The results are in ascending order.
Answer: B
Explanation: Reference: <http://www.postgresql.org/docs/8.2/static/sql-select.html#SQL-ORDERBY>
From Pedersen: MySQL 5.0 Certification Study Guide by Dubois, Hinz, and "By default, the rows in the result set produced by a SELECT statement are returned by the server to the client in no particular order. When you issue a query, the server is free to return the rows in any convenient order. This order can be affected by factors such as the order in which rows are actually stored in the table or which indexes are used to process the query."
