## (CISSP) New Braindumps

Every question or request about CISSP pass torrent files, no matter how trivial it seems, is important to person who makes it, First and foremost, the pass rate on our CISSP exam dumps among our customers has reached as high [Certified Information Systems Security Professional \(CISSP\)](#) as 98% to 100%, which marks the highest pass rate in the field, we are waiting for you to be the next beneficiary.

We also have a talented customer services team who with Valid Dumps CISSP Ppt their courteous attitude and exceptional empathy skills solve out the problems faced by customers very easily.

If you are still preparing for other certification exams except, **New CISSP Braindumps** you can also find the related exam study material you want in our site, Estruturit is professional platform to establish for compiling CISSP exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way.

Get Free Advice for the Certification Exams Our customers' care is available 24/7 for all visitors on our pages, The knowledge you have studied on our CISSP exam question will enrich your life and make you wise.

Once you fail the exam we will refund you all, Our CISSP study material can be your best helper, The correct answer of the CISSP exam torrent is below every question, which helps you check your answers.

So as you see, we are the corporation with ethical **New CISSP Braindumps** code and willing to build mutual trust between our customers, For the people who will attend exam in the near time, you can get [AD01 Key Concepts](#) the latest information in the year, or you can share your information with your friends.

The experts we hired who dedicated to the CISSP exam collection for so many years, so these versions are the achievements of them including PDF, Software and the most amazing one APP, the value pack of CISSP test dumps.

**NEW QUESTION: 1**What are the benefits of using Netflow? (Choose three.)  
**A.** Security Analysis  
**B.** Accounting/Billing  
**C.** Network, Application & User Monitoring  
**D.** Network Planning  
**Answer: A,B,C**  
**Explanation:**NetFlow traditionally enables several key customer applications including:  
+ Network Monitoring - NetFlow data enables extensive near real time network monitoring capabilities. Flow-based analysis techniques may be utilized to visualize traffic patterns associated with individual routers and switches as well as on a network-wide basis(providing aggregate traffic or application based views) to provide proactive problem detection, efficient troubleshooting, and rapid problem resolution.  
+ Application Monitoring and Profiling - NetFlow data enables network managers to gain a detailed, time-based, view of application usage over the network. This information is used to plan, understand new services, and allocate network and application resources (e.g.Web server sizing and VoIP deployment) to responsively meet customer demands.  
+ User Monitoring and Profiling - NetFlow data enables network engineers to gain detailed understanding of customer/user utilization of network and application resources. This information may then be utilized to efficiently plan and allocate access, backbone and application resources as well as to detect and resolve potential security and policy violations.  
+ Network Planning - NetFlow can be used to capture data over a long period of time producing the opportunity to track and anticipate network growth and plan upgrades to increase the number of routing devices, ports, or higher- bandwidth interfaces. NetFlow

services data optimizes network planning including peering, backbone upgrade planning, and routing policy planning. NetFlow helps to minimize the total cost of network operations while maximizing network performance, capacity, and reliability. NetFlow detects unwanted WAN traffic, validates bandwidth and Quality of Service (QoS) and allows the analysis of new network applications. NetFlow will give you valuable information to reduce the cost of operating your network.+ Security Analysis - NetFlow identifies and classifies DDOS attacks, viruses and worms in real-time. Changes in network behavior indicate anomalies that are clearly demonstrated in NetFlow data. The data is also a valuable forensic tool to understand and replay the history of security incidents.+ Accounting/Billing - NetFlow data provides fine-grained metering (e.g. flow data includes details such as IP addresses, packet and byte counts, timestamps, type-of-service and application ports, etc.) for highly flexible and detailed resource utilization accounting. Service providers may utilize the information for billing based on time-of-day, bandwidth usage, application usage, quality of service, etc. Enterprise customers may utilize the information for departmental charge-back or cost allocation for resource utilization.

**NEW QUESTION: 2** You are the project manager for your organization. You have identified a risk event you're your organization could manage internally or externally. If you manage the event internally it will cost your project \$578,000 and an additional \$12,000 per month the solution is in use. A vendor can manage the risk event for you. The vendor will charge \$550,000 and \$14,500 per month that the solution is in use. How many months will you need to use the solution to pay for the internal solution in comparison to the vendor's solution?  
**A.** Approximately 13 months  
**B.** Approximately 15 months  
**C.** Approximately 11 months  
**D.** Approximately 8 months  
**Answer: C**

**NEW QUESTION: 3** An app builder has been to display an overdue date that is two months after a task's due date. Which approach should the app builder take?  
**A.** Use process builder and set overdue date equal to  $\text{DueDate} + ((365/12)*2)$   
**B.** Use process builder and set overdue Date equal to  $\text{DueDate} + 60$   
**C.** Create a formula field using the `ADDMONTHS()` function  
**D.** Create a formula field using  $\text{DueDate} + 60$   
**Answer: D**

**NEW QUESTION: 4** Lori was performing an audit of her company's internal Sharepoint pages when she came across the following code. What is the purpose of this code?  
**A.** This JavaScript code will use a Web Bug to send information back to another server.  
**B.** This code snippet will send a message to a server at 192.154.124.55 whenever the "escape" key is pressed.  
**C.** This code will log all keystrokes.  
**D.** This bit of JavaScript code will place a specific image on every page of the RSS feed.  
**Answer: C**  
Explanation: Topic 2, Volume B
