NEW QUESTION: 1A user has launched an RDS PostgreSQL DB with AWS. The user did not specify the maintenance window during creation. The user has configured RDS to update the DB instance type from micro to large. If the user wants to have it during the maintenance window, what will AWS do?**A.** AWS will ask the user to specify the maintenance window during the update**B.** It is not possible to change the DB size from micro to large with RDS**C.** AWS will select the default maintenance window if the user has not provided it**D.** AWS will not allow to update the DB until the maintenance window is configured**Answer: C****Explanation:**AWS RDS has a compulsory maintenance window which by default is 30 minutes. If the user does not specify the maintenance window during the creation of RDS then AWS will select a 30-minute maintenance window randomly from an 8-hour block of time per region. In this case, Amazon RDS assigns a 30-minute maintenance window on a randomly selected day of the week.
