NEW QUESTION: 1 IAM (Identity and Access Management)과 관련하여, 애플리케이션에 속하는 특정 유형의 특수 계정으로 프로그래밍 방식으로 코드가 Google 서비스에 액세스 할 수 있습니까?**A.** 단순 키**B.** 서비스 계정**C.** OAuth**D.** 코드 계정**Answer: B****Explanation:**Explanation A service account is a special Google account that can be used by applications to access Google services programmatically. This account belongs to your application or a virtual machine (VM), instead of to an individual end user. Your application uses the service account to call the Google API of a service, so that the users aren't directly involved. A service account can have zero or more pairs of service account keys, which are used to authenticate to Google. A service account key is a public/private key pair generated by Google. Google retains the public key, while the user is given the private key.<https://cloud.google.com/iam/docs/service-accounts>

NEW QUESTION: 2 An organization is designing a virtual server environment. They have an application that requires a significant amount of communication with a database. The application and database will be located on different physical servers and configured on the same VLAN. For performance, both the application and database will have dedicated network adapters. Which virtualization functionality is negatively impacted by bypassing the hypervisor when configuring the dedicated network adapters for the applications?**A.** Shared storage**B.** Converged networking**C.** Mobility**D.** Data replication**Answer: C****Explanation:**Reference: Topic C. Articulate planning and design needs and considerations for networking within virtualized environments Training: Mod 3, Designing for Virtualized and Cloud Environments

NEW QUESTION: 3 You are a business analyst for your organization and you're working with Mary. Mary wants to know what you need to complete the process of planning the business analysis approach if you're already the business analyst for your organization. This approach helps to find out the following except for which one?**A.** Who will be observed in job shadowing?**B.** Who will be consulted regarding and informed of the approach?**C.** What is the rationale for using it?**D.** Which stakeholders need to be involved in the decision?**Answer: A****Explanation:** Explanation/Reference: The plan business analysis approach is required to select an approach that will perform business analysis. This approach helps to find out the following: Which stakeholders need to be involved in the decision? Who will be consulted regarding and informed of the approach? What is the rationale for using it?
