Getting the NSE5\_FMG-7.0 certificate of the exam is just a start, We cannot imagine the world without Internet and technology.

**NEW QUESTION: 1** Refer to the exhibit. During a QSIG tunneling over SIP call establishment, which two types of SIP messages can the OGW use to tunnel a waiting QSIG message? (Choose two.)  
**A.** SIP UPDATE **B.** SIP OPTIONSC. SIP NOTIFY **D.** SIP INFO **E.** SIP REFER **F.** SIP re-INVITE

**Answer: A, F**  
**Explanation:** Explanation/Reference: Explanation: The TGW sends and the OGW receives a 200 OK response--the OGW sends an ACK message to the TGW and all successive messages during the session are encapsulated into the body of SIP INFO request messages. There are two exceptions: When a SIP connection requires an extended handshake process, renegotiation, or an update, the gateway may encapsulate a waiting QSIG message into a SIP re-INVITE or SIP UPDATE message during QSIG call establishment. When the session is terminated, gateways send a SIP BYE message. If the session is terminated by notice of a QSIG RELEASE COMPLETE message, that message can be encapsulated into the SIP BYE message.
