Explanation:<http://technet.microsoft.com/en-us/library/hh831349.aspx>Scale-Out File Server for Application data (Scale-Out File Server) This clustered file server is introduced in Windows Server 2012 and lets you store server Application data, such as Hyper-V virtual machine files, on file shares, and obtain a similar level of reliability, availability, manageability, and high performance that you would expect from a storage area network. All file shares are online on all nodes simultaneously. File shares associated with this type of clustered file server are called scale-out file shares. This is sometimes referred to as active-active.
