If you want to nail your Splunk SPLK-1005 exam with the best marks, then you will have to work

smartly for that, The SPLK-1005 test simulate products are the software which can simulate the real test scenes.

For preventing information leakage, our SPLK-1005 test torrent will provide the data protection for all customers, We have a group of experts who devoted themselves to SPLK-1005 practice vce research over ten years and they have been focused on proficiency and accuracy of SPLK-1005 latest vce according to the trend of the time closely.

Or your payment will revert to you fully, [Exam Dumps Marketing-Cloud-Personalization Pdf](#) While accumulating these abundant knowledge and experience needs a lot of time.

NEW QUESTION: 1 Which two statements about IS-IS are true? (Choose two.)
A. Both IS-IS routers need to have the same capabilities in the hello packet in order to form neighbors.
B. Both routers need to have the same hello intervals and hold timers in order to form IS-IS neighbors.
C. The hello interval can be changed on a per-interface basis with the command `isis hello-multiplier`.
D. The default hello interval is 10 seconds and the default hold timer is 30 seconds.
Answer: C, D
Explanation: `isis hello-interval` To specify the length of time between hello packets that the Cisco IOS software sends, use the `isis hello-interval` command in interface configuration mode. By default, a value three times the hello interval seconds is advertised as the hold time in the hello packets sent. (Change the multiplier of 3 by specifying the `isis hello-multiplier` command.) With smaller hello intervals, topological changes are detected faster, but there is more routing traffic. The default is 10 seconds.
