NEW QUESTION: 3 Review the screenshot from FileVault preferences, and then answer the question below. If you click Enable User for the Logan White account, what is the effect?
A. You are prompted immediately to enter the login password for the Logan White account, after which, Logan White will be able to unlock and decrypt the system disk, and restart the computer.
B. You are prompted immediately to enter an administrator password, after which, the user of the Logan White account will be able to unlock and decrypt the system disk, and restart the computer.
C. At next login, the user of the Logan White account will be prompted to enter the login password, after which, the user will be able to unlock and decrypt the system disk, and restart the computer.
D. FileVault 2 is enabled immediately for the Logan White account, and FileVault begins encrypting the Logan White home folder.
Answer: B

NEW QUESTION: 4 You need to ensure that all the MVC controllers are secure. Which code segment should you use as the body for the CreateController method in AdminVerifierFactory.cs?
A. Option D
B. Option C
C. Option B
D. Option A
Answer: B
Explanation: Explanation/Reference: Explanation: The MemberInfo.CustomAttributes property gets a collection that contains this member's custom attributes. The Any() statement will either return null or a collection of matched custom attributes. If it matches one or more, the controller is secure, otherwise an exception is thrown. From scenario: The application contains a header that is visible on every page. If the logged-on user is an administrator, then the header will contain links to administrative functions. This information is read from a cookie that is set on the server. The administrative links must not be present if an error condition is present.
Incorrect: Not B: controller.GetType().Attributes will not return custom attributes.
